

3 March 1944

Some duplication of effort can be avoided in certain OSS chapters by referring to another chapter in the JANIS volume for details on certain topics. For example, detailed tables on rainfall or temperature can be eliminated from water supply discussion, inasmuch as such tables will occur in the chapter on climate. Likewise, detailed description of water approaches to towns can be omitted, inasmuch as the descriptions in the chapter on ports cover water approaches in detail.

Each chapter stands by itself when it serves its purpose with a brief statement on pertinent related factors, treated in detail in other chapters. Details, as indicated above however can be left to the specialized chapters and a cross reference included.
